

Patent Licensing and Enforcement on a Contingency Basis

General Patent Corporation (GPC) is a leading intellectual property (IP) boutique focusing on patent licensing and enforcement. Our mission is to secure equitable reward for the use of our client's intellectual property. Founded in 1987, GPC has specialized in licensing and enforcing patents longer than any other organization. In addition to offering assertive IP licensing on a contingency basis, General Patent offers a comprehensive package of IP consulting services.

General Patent assists inventors, small businesses, universities and other owners of patents, trademarks, copyrights and other forms of intellectual property with enforcement of their IP rights on a 100% contingency basis. This means that GPC bears all the expenses of an IP enforcement campaign, and is paid based on the results it produces for its client, earning an agreed-to share of all settlements, licensing fees and other revenue it generates for the IP owner.

GPC Suite of Services

What differentiates General Patent is the comprehensive package of services it offers its clients. Not all clients require or use all of these services.

- Evaluate the viability of the infringement claim, including its validity and financial return
- Identify all potential infringers
